These meteoric showers, these pieces of "cosmic dust," contain carbon. There are inclosed in their interior masses similar to mold. Thus it was with the meteorite that fell near Kaba, in Hungary, now in Reichenhagh's collection; and now in Reichenbach's collection; and the same traces of erganic matter are found in one from Orgueil, in France, and another from Bokkehart, at the Cape of Good Hope. SPECIAL NOTICE. The Evil Fruits of Weak Digestion. There is no pathological fact more clearly assertained than that the most formidable phases of nervous disease are directly traceable to imperfect digestion. Insomnia, with its train of direful consequences, proceeds more frequently from weakness of the stomach than from any other cause. Mere sedatives are powerless to cure nervourness, and soon cease to palliate its symptoms. The true way to strengthen the nervous system is to invigorate the digestive and assimilative organs, upon whose unobstructed action its equilibrium is absolutely dependent. The daily use of Hortetter's Stomach Bitters will do more to brace and soothe the weakened and irritated nerves, and induce sound, refreehing sleep nature's grand catheliconthan all the so-called nervines to be found in the pharmacopæia or out of it. monument of human thought, is not as yet established beyond a doubt; on the contrary, excellent chemists—such as geologists rarely are—have brought incontrovertible proof that certain bodies on our earth have never been in a moiten condition, and that the composition of many minerals does not support the theory of their having been produced by plutonic processes. The merits of Laplace's theory I will not now discuss. I only take the liberty to point to the fact that there is a minority—in numbers at least—of acientists who do not admit the possibility of living matter having everoriginated from dead matter, and therefore do not believe in spontaneous generation at any time, however remote. Their views I will briefly state: All living matter in the universe has de-
